

Tech safety in just a click

TECHNOLOGY is here to stay and teaching children how to be safe online is now more important than ever, a cyber safety expert says.

Cyber safety expert Susan McLean (pictured) spent two days at Bray Park's Genesis

Christian College last month teaching students from Year 3 to Year 12, and their parents, about online safety.

"Technology is here to stay, it's not a fad or fashion," she said, adding 21st century parents must "parent online".

"You have to be prepared to say no to your children when it comes to online."

College student wellbeing director Anthony Arro said the school advocated for smart, safe and responsible technology use.
